New Materials and Methods for CMOS Devices

Ultra-shallow junction by laser annealing: Integration issues and modelling
A. La Magna, P. Alippi, I. Deretzis, V. Privitera, G. Fortunato, L. Mariucci, A. Magrì, E. Monakhov and B. Svensson . . 1
An EXAFS investigation of arsenic shallow implant activation in silicon after laser sub-melt annealing
D. Giubertoni, G. Pepponi, M. Bersani, S. Gennaro, F. D'Acapito, R. Doherty and M.A. Foad 9
Laser annealing of plasma implanted boron for ultra-shallow junctions in Silicon
A. Florakis, D. Tsoukalas, I. Zergioti, K. Giannakopoulos, P. Dimitrakis, D.G. Papazoglou, G. Bennassayag, H. Bourdon and A. Halimaoui 13
Optical strain measurement in ultrathin sSOI wafer
J. Munguía, H. Chouaib, J. de la Torre, G. Bremond, C. Bru-Chevallier, A. Sibai, B. Champagnon, M. Moreau and J.-M. Bluet 18
HRXRD studies of strain relaxation in ion-implanted strained Si on relaxed $Si_{1-x}Ge_x$
M.S. Phen, V. Craciun, K.S. Jones, J.L. Hansen and A.N. Larsen 22
Strain relaxation in thin SiGe epilayers doped with carbon
M.Ya. Valakh, V.M. Dzhagan, O.S. Lytvyn, V.P. Melnik, B.M. Romanjuk and V.O. Yukhymchuk 27
Photoluminescence and TEM evaluations of defects generated during SiGe-on-insulator virtual substrate fabrication: Temperature ramping process
D. Wang, S. Ii, K. Ikeda, H. Nakashima, K. Matsumoto, M. Nakamae and H. Nakashima 31
CV characteristics of polycrystalline sige films with low GE concentration
R.C. Teixeira, I. Doi, J.A. Diniz, J.W. Swart and M.B.P. Zakia 37

USJ Formation

Physical insight into ultra-shallow junction formation through atomistic modeling
L. Pelaz, M. Aboy, P. Lopez, L.A. Marques and I. Santos 41
B diffusion and activation phenomena during post-annealing of C co-implanted ultra-shallow junctions
M. Di Marino, E. Napolitani, M. Mastromatteo, G. Bisognin, D. De Salvador, A. Carnera, S. Mirabella, G. Impellizzeri, F. Priolo, H. Graoui and M.A. Foad 46
Mechanism of de-activation and clustering of B in Si at extremely high concentration
L. Romano, A.M. Piro, V. Privitera, E. Rimini, G. Fortunato, B.G. Svensson, M. Foad and M.G. Grimaldi 50
Lattice strain of B–B pairs formed by He irradiation in crystalline $Si_{1-x}B_x$/Si
G. Bisognin, D. De Salvador, E. Napolitani, A. Carnera, L. Romano, A.M. Piro, S. Mirabella and M.G. Grimaldi 55
The effect of thermal treatments on the local geometry around indium in In and In + C high dose implanted Si
F. d'Acapito, Y. Shimizu, S. Scalese, M. Italia, P. Alippi and S. Grasso 59
Modeling charged defects, dopant diffusion and activation mechanisms for TCAD simulations using kinetic Monte Carlo
I. Martin-Bragado, S. Tian, M. Johnson, P. Castrillo, R. Pinacho, J. Rubio and M. Jaraiz 63

Defects Evolution and Point Defect Engineering

Defects evolution and dopant activation anomalies in ion implanted silicon
F. Cristiano, Y. Lamrani, F. Severac, M. Gavelle, S. Boninelli, N. Cherkashin, O. Marcelot, A. Claverie, W. Lerch, S. Paul and N. Cowern 68

doi:10.1016/S0168-583X(06)01144-X

Transformation of {1 1 3} defects into dislocation loops mediated by the {1 1 1} rod-like defects
S. Boninelli, N. Cherkashin, A. Claverie and F. Cristiano 80
Annealing studies of cluster defects in ion-implanted silicon using high resolution DLTS
M.A. Gad and J.H. Evans-Freeman 85
Experimental measurement of in-depth secondary defects distribution produced by helium implantation in silicon
S. Daliento, L. Mele, P. Spirito, L. Gialanella, B.N. Limata and M. Romano 90
Point defect engineering in preamorphized silicon enriched with fluorine
G. Impellizzeri, S. Mirabella, F. Priolo, E. Napolitani and A. Carnera 94
Effect of fluorine on boron diffusion under interstitial injection from the surface
M.N. Kham, H.A.W. El Mubarek, J.M. Bonar, D. Chivers and P. Ashburn 100

Diffusion Studies

Advanced dopant and self-diffusion studies in silicon
H. Bracht 105
Nitrogen in silicon: Transport and mechanical properties
J.D. Murphy, C.R. Alpass, A. Giannattasio, S. Senkader, R.J. Falster and P.R. Wilshaw 113
Modeling of hydrogen diffusion in silicon crystals
A. Saad, O.I. Velichko, Yu.P. Shaman, A.V. Mazanik, A.K. Fedotov and V.V. Fedotova 118
The effect of arsenic fluence on the boron diffusion in the polysilicon on monosilicon during rapid thermal annealing
A. Merabet and J. Marcon 122
Hydrogen gettering at buried defect layers in ion-implanted silicon by plasma hydrogenation and annealing
A.G. Ulyashin, J.S. Christensen, B.G. Svensson, R. Kögler and W. Skorupa 126

Characterization

Positron annihilation spectroscopy of vacancy complexes in SiGe
J. Slotte 130
Beyond SRP: Quantitative carrier profiling with M4PP.
T. Clarysse, W. Vandervorst, R. Lin, D.H. Petersen and P.F. Nielsen 136
Scanning spreading resistance microscopy of shallow doping profiles in silicon
A. Suchodolskis, A. Hallén, J. Gran, T.-E. Hansen and U.O. Karlsson 141
Quantitative local strain measurements in compressive strained Ge/tensile strained Si bi-layers grown on top of relaxed $Si_{0.5}Ge_{0.5}$ virtual substrates
N. Cherkashin, M.J. Hÿtch, E. Snoeck, F. Hüe, J.M. Hartmann, Y. Bogumilowicz and A. Claverie 145
Strain field reconstruction in shallow trench isolation structures by CBED and LACBED
A. Spessot, S. Frabboni, R. Balboni and A. Armigliato 149

Defects and Impurities

Defects and impurities in SiGe: The effect of alloying
A. Mesli, Vl. Kolkovsky, L. Dobaczewski, A. Nylandsted Larsen and N.V. Abrosimov 154
Low-temperature radiation controlled diffusion of palladium and platinum in silicon for advanced lifetime control
J. Vobecký and P. Hazdra 162
Fe and Cu in Si: Lattice sites and trapping at implantation-related defects
U. Wahl, J.G. Correia, E. Rita, J.P. Araújo and J.C. Soares, The ISOLDE Collaboration 167
The As_2V complex in silicon: Band-gap levels, migration and annealing
H. Kortegaard Nielsen, A. Mesli, L. Dobaczewski, K. Bonde Nielsen, C.E. Lindberg, V. Privitera and A. Nylandsted Larsen 172
Evolution of hydrogen induced defects during annealing of plasma treated Czochralski silicon
H. Nordmark, A. Ulyashin, J.C. Walmsley, B. Tøtdal and R. Holmestad 176
Hydrogen implantation-induced defects in bulk Si studied by Raman spectrometry
C. Villeneuve, V. Paillard, K.K. Bourdelle, I. Cayrefourcq, A. Boussagol and M. Kennard 182
Thermal donor formation in silicon enhanced by high-energy helium irradiation
P. Hazdra and V. Komarnitskyy 187
Dielectric function of disorder in high-fluence helium-implanted silicon
P. Petrik, M. Fried, T. Lohner, N.Q. Khánh, P. Basa, O. Polgár, C. Major, J. Gyulai, F. Cayrel and D. Alquier 192
Vibrational lifetimes of light impurities in silicon
S.K. Estreicher and D. West 196
Isotope effects and temperature-dependence studies on vibrational lifetimes of interstitial oxygen in silicon
K.K. Kohli, G. Davies, N.Q. Vinh, D. West, S.K. Estreicher, T. Gregorkiewicz, I. Izeddin and K.M. Itoh 200

Stress-dependent transformation of interstitial oxygen in processed Ge-doped Cz-Si
A. Misiuk, C.A. Londos, J. Bak-Misiuk, D. Yang, W. Jung and M. Prujszczyk 205
Evolution of radiation-induced carbon–oxygen-related defects in silicon upon annealing: LVM studies
L.I. Murin, J.L. Lindström, G. Davies and V.P. Markevich 210
Effect of high pressure annealing on electrical properties of nitrogen and germanium doped silicon
W. Jung, A. Misiuk and D. Yang 214
Deep level generation in nitrogen-doped float-zoned silicon
G.I. Voronkova, A.V. Batunina, L. Moiraghi, V.V. Voronkov, R. Falster and M.G. Milvidski 217
Structural and nuclear characterizations of defects created by noble gas implantation in silicon oxide
H. Assaf, E. Ntsoenzok, M.-F. Barthe, M.-O. Ruault, T. Sauvage and S. Ashok. 222

Miscellaneous

Is there an influence of ion-beam-induced interfacial amorphization on the a/c-interface depth in silicon at common implantation energies?
G. Otto, G. Hobler, P. Pongratz and L. Palmetshofer. 227
Observation of steplike sheet resistance increase of shallow doped bare silicon during initial contact to air
B. Kalkofen and E.P. Burte 232
X-ray studies of ultra-thin Si wafers for mirror application
J. Sass, K. Mazur, B. Surma, F. Eichhorn, D. Litwin, J. Galas and S. Sitarek 236
Carbon surface diffusion and SiC nanocluster self-ordering
J. Pezoldt, Yu.V. Trushin, V.S. Kharlamov, A.A. Schmidt, V. Cimalla and O. Ambacher 241
Temperature dependence of drain current hysteresis in FD and PD-SOI n-MOSFETs
K. Hayama, K. Takakura, H. Ohyama, J.M. Rafi, A. Mercha, E. Simoen and C. Claeys 246
2-D simulation and analysis of temperature effects on electrical parameters degradation of power RF LDMOS device
M.A. Belaïd, K. Ketata, M. Gares, J. Marcon, K. Mourgues and M. Masmoudi 250
Hydrogen dilution effect on microstructure of Si thin film grown by catalyzer enhanced chemical vapor deposition
H.-K. Kim 255
Grooving of grain boundaries in multicrystalline silicon: Effect on solar cell performance
W. Dimassi, M. Bouaïcha, H. Nouri, M.F. Boujmil, S. Ben Nasrallah and B. Bessaïs 260
Combination of gettering and etching in multicrystalline silicon used in solar cells processing
W. Dimassi, M. Bouaïcha, H. Nouri, S. Ben Nasrallah and B. Bessaïs 264
A quantitative stress-related model for the evolution of the pore size in porous silicon during high temperature annealing
M.M. Hassan, M.Y. Ghannam, J. Poortmans and R. Mertens 269
TEM study of PtSi contact layers for low Schottky barrier MOSFETs
A. Łaszcz, J. Kątcki, J. Ratajczak, A. Czerwinski, N. Breil, G. Larrieu and E. Dubois 274
Metal and organic contamination effects on the characteristics of thin oxides thermally grown on silicon based wafers
G. Borionetti, P. Geranzani, R. Orizio, P. Godio, F. Bonoli, F. Pagani and C. Pello' 278
